REMARKS

The Notice points out errors in the Request for Drawing Changes submitted with the RCE. Applicant submits this amendment and a new Request for Drawing changes in a good faith effort to comply with all applicable rules.

Accordingly, copies of FIGS. 7 and 8 as filed are enclosed with requested changes shown in red. The drawing copies are labeled "Annotated Marked Up Sheet." New drawing sheets, each labeled "Replacement Sheet," containing FIGS. 7, FIG. 8A and FIG. 8B are also enclosed. The replacement sheets include all of the requested changes. The requested changes involve adding or changing reference characters, deleting dimensions and dimension lines, deleting extraneous marks that arose in from photocopying the original drawings. The two figures that were identified as FIG. 8 are now identified as FIG. 8A and FIG. 8B. None of the requested changes involve the technical subject matter of the invention or present any new matter.

Specification amendments have been requested where appropriate to change references to "FIG. 8" to FIGS. 8A and 8B to make the drawing figure references in the description of the invention correspond to the drawing figures as amended.

Applicant believes that this response complies with the Notice and requests continued processing of the application.

Respectfully submitted,
